SKILLS

Angular 2+, Ionic, Express, MongoDB, RethinkDb, Node.Js, HTML, CSS/Sass, Javascript, React, React Native, Redux, Java, Ruby, Ruby on Rails, Sinatra, Git, Github, command line

WEB DEVELOPMENT EXPERIENCE

Simon Game <https://github.com/GeorgeRXia/react-native-simon>

- A single and multiplayer memory game with four game modes.
- Implemented Node webSockets for real time score keeping between players.
- Used Rails to trigger webSockets to support a round based multiplayer game experience.
- Implemented it on React Native.
- In the backend, Implemented tables and used Rails to create logic for game lobby.
- This was a solo project done in a ten day sprint.

Paper Boy News https://github.com/GeorgeRXia/paperboy_frontend

- A news aggregation site linking to multiple popular and local news outlets.
- Implemented news' articles in chronological order.
- Allowed user to select and remove specific news sources from the SQL database.
- Implemented models to allow users to create an account to save selected sites.
- Implemented relations in database between tables, constructed logic, and added validations.
- Implemented API calls in both backend and frontend.
- Coded the order in which the scrapers and API calls would run for a faster load time.
- This was done in one week.
